Letter from EB

We are delighted to welcome you all to the Marvel Cinematic Universe Committee of SOMUN '26. As huge Marvel nerds look forward to seeing old and new rivalries emerge and new paths forged, just like Stormbreaker was. We expect our delegates to do thorough research on their characters and the various multifarious characters and elements that make Marvel, in short, MARVEL. Confidence, thorough research and quick thinking will help each one of you thrive in this committee. Good oratory skills do not matter much in the face of substance, quality, and content. Your imagination and creative thinking are your greatest asset.

The agenda is meant to make you think and wonder about the multiple what-ifs that come with the territory of being a Marvel nerd. Devising new paths and the flow of the committee is completely up to you, and we hope to see out-of-the-box innovative directives.

We advise you to go over the various movies and series featured before Infinity War and be extremely thorough with characters and storylines, if you want to be aware of the happenings of the committee. Moreover, we advise you to steer away from the multiverse and expand your research radius to all branches of Marvel and not just the main characters or OT6.

Oftentimes, it's the delegate with a lesser-known allocation and portfolio that usually bags the best delegate award, so make full use of your knowledge about Marvel and its world-building and characters rather than coming unprepared and going with the flow. This guide is meant to be exactly what its name suggests. A guide. This should not be the entirety of your research and should be used as a tool rather than a crutch bearing the weight of your entire preparation for the conference. For questions and doubts, the EB is always available.

We hope to learn from you and hope that you can take a thing or two back and aspire to have a committee worth remembering months from now. We promise to keep the committee fun and engaging while also keeping it informative and a learning experience, as an MUN is supposed to be.

Godspeed,

Sukrithi Kallurmath - Chairperson

Aakaanksha Mohapatra - Vice Chairperson

Roshan Vangavety – Rapporteur

Introduction to the Committee:

Welcome to Marvel Cinematic Universe Committee!

This is an emergency war room brought together inside the Wakandan Citadel in mid-May 2018, during the brutal Battle of Wakanda. This council brings together heroes, world leaders, sorcerers, and cosmic allies to take control of the chaos and figure out what comes next.

This isn't a slow diplomatic meeting it's a high-stakes crisis room where decisions need to be made fast. Delegates must unite the extraordinary powers of Vibranium technology, Pym Particles, ancient magic, and countless other marvels to forge a defence against threats capable of inflicting irreversible damage upon the universe itself.

At the same time, everyone in this room must put past grudges and political messes behind them. Earth and space defence networks need to be merged immediately, so the team is ready for the next move. Every decision changes the battlefield, every move shapes the crisis, and the fate of the planet depends on whether this committee can stand together when it matters most.

About the Characters:

1. **Captain America**: A super-soldier who fought in World War II, and he leads the Avengers.
2. **Iron Man**: Genius, billionaire, playboy, philanthropist; controls Stark Industries; has access to high-tech suits.
3. **Thor**: God of Thunder, Asgardian, can access Bifrost
4. **Hulk**: Bruce Banner is a highly intelligent scientist, and Hulk is a gamma-powered version of him
5. **Black Widow**: She is an Agent of S.H.I.E.L.D.; she is also a skilled fighter who was trained when she was young
6. **Hawkeye / Ronin:** He is also an Agent of S.H.I.E.L.D. He uses a bow and arrow and is also a skilled swordsman.
7. **Falcon**: He was an Air Force agent and has access to a high level of aerial technology (his suit)
8. **Winter Soldier**: A super soldier who fought in World War II and has a left arm that is made of Vibranium.
9. **Scarlet Witch:** She is a powerful magic witch who can manipulate hex energy and reality.
10. **Vision:** He is a machine who is made up of vibranium and is powered by the Mind Stone.
11. **War Machine**: A heavily armoured military officer with access to high-tech suits.
12. **Spider-Man**: A teenager who has spider-like powers and has super strength
13. **Black Panther**: King of Wakanda; he also has access to vibranium suits and vibranium reserves
14. **Doctor Strange:** He is a master sorcerer who has the Eye of Agamotto.
15. **Captain Marvel:** She has cosmic powers and can channel massive energy bursts.
16. **Ant-Man:** He has a suit where; with the help of Pym particles, he can either grow or shrink.
17. **Star-Lord:** Leader of the Guardians of the Galaxy and half human and half alien.
18. **Nebula:** She is a robotic assassin who has a high level of intelligence and is the daughter of Thanos
19. **M' Baku**: He is a tribal leader who leads the Jabari clan.
20. **Janet Van Dyne:** She is a quantum scientist who can carry out operations with her Wasp suit (using Pym particles).
21. **Gamora**: She is an Outer Space assassin who is part of the Guardians of the Galaxy and is the daughter of Thanos.
22. **Rocket**: A cyber-modified raccoon who has access to a lot of high-tech weapons and is also intelligent.
23. **Groot**: A tree-like alien who can generate wood-related structures or weapons
24. **Drax:** An alien brute who has an insane amount of strength and can handle big threats.
25. **Valkyrie:** An Asgardian warrior who is a really skilled fighter and controls the Valkyrie troops

26. **Shang-Chi:** He received heavy martial arts training as a child and is an expert in hand-to-hand combat.
27. **Yelena Belova:** She is an assassin who conducts infiltration and undercover operations.
28. **Nick Fury:** He is an intelligent individual, and he is also the director of S.H.I.E.L.D. and has access to high-tech weapons.
29. **Wong:** He is a highly experienced sorcerer who can create a lot of very strong defensive spells.
30. **Hank Pym:** He is a genius scientist, and he is the one who created the Pym Particles.
31. **Loki:** An Asgardian God of Mischief who has access to illusion and ancient magic.
32. **Namor:** Ruler of the underwater kingdom of Talokan who has water manipulation abilities.
33. **Hela:** Asgardian Goddess of Death who wields dark necro-blade magic and can bring people back from the dead
34. **Wasp:** She has a high-tech aerial suit which also allows her to shrink and grow (Pym particles)
35. **Red Guardian:** He is Russia's one and only super soldier who has superhuman abilities.
36. **Mantis:** She is an alien who can control other beings' emotions and minds just with her touch.
37. **Happy Hogan:** Head of Stark logistics, and he manages the technology of Stark Industries.
38. **Shuri:** She is a genius who invented Wakandan technology, Vibranium technology, etc
39. **Okoye:** She is the General of Wakanda's Dora Milaje guards, who are really skilled fighters
40. **Lady Sif:** She is a skilled Asgardian warrior who can direct heavy troop defences.

Timeline Of Events

Iron Man (2008)
When brilliant industrialist Tony Stark is captured by terrorists in Afghanistan using his own weapons, he builds a crude suit of armor to escape. Deeply affected by the experience, he shuts down Stark Industries' weapons division and refines his high-tech armour to fight global threats. However, he soon faces a betrayal from within his own company as executive Obadiah Stane seeks to weaponize the technology for himself.

The Incredible Hulk (2008)
Scientist Bruce Banner goes into hiding in South America, desperately seeking a cure for the gamma radiation that transforms him into a raging green monster when triggered by stress or anger. Meanwhile, General Thaddeus Ross relentlessly hunts him to turn his biology into a military asset. Banner is forced out of hiding when power-hungry soldier Emil Blonsky undergoes a similar experiment, turning into the destructive Abomination.

Iron Man 2 (2010)
Now publicly known as Iron Man, Tony Stark faces pressure from the U.S. government to turn over his suit technology. At the same time, the palladium core keeping him alive is slowly poisoning his blood. Stark must resolve his personal turmoil while contending with Ivan Vanko (Whiplash), a vengeful Russian scientist allied with rival defence contractor Justin Hammer to build an army of armoured drones.

Thor (2011)
Arrogant Asgardian prince Thor reignites an ancient war with the Frost Giants through a reckless act of defiance. Disowned by his father Odin, Thor is stripped of his powers and banished to Earth alongside his enchanted hammer, Mjolnir, which he can no longer lift. On Earth, Thor learns humility through human companionship, while his deceptive brother Loki plots to seize the throne of Asgard in his absence.
Captain America: The First Avenger (2011)
During World War II, frail but brave Steve Rogers is selected for the secret Super-Soldier program, transforming his body into peak human physical condition. Operating as Captain America, Rogers leads a unit against HYDRA—the Nazi science division headed by Johann Schmidt (Red Skull), who has harnessed the cosmic power of a mysterious artifact called the Tesseract to dominate the globe.

The Avengers (2012)
When Loki steals the Tesseract from S.H.I.E.L.D. and opens a wormhole above New York to lead an invading alien army called the Chitauri, S.H.I.E.L.D. director Nick Fury activates the Avengers Initiative. Earth's mightiest heroes—Iron Man, Captain America, Thor, Hulk, Black Widow, and Hawkeye—must overcome their massive egos and conflicting ideals to unite as a team and save the planet.

Iron Man 3 (2013)
In the aftermath of the Battle of New York, Tony Stark suffers from severe PTSD and panic attacks, compulsively building dozens of new suits. When a shadowy terrorist figure known as the Mandarin destroys Stark's home and leaves his loved ones vulnerable, a stripped-down Tony must rely solely on his wits and basic engineering to uncover a conspiracy led by Advanced Idea Mechanics (AIM) founder Aldrich Killian.

Thor: The Dark World (2013)
An ancient cosmic alignment known as the Convergence reawakens Malekith, leader of the Dark Elves, who seeks to unleash a liquid reality-warping weapon called the Aether (the Reality Stone) to plunge the Nine Realms into eternal darkness. After the Aether bonds with astrophysicist Jane Foster, Thor brings her to Asgard and forms an uneasy alliance with his imprisoned brother Loki to defeat Malekith.

Captain America: The Winter Soldier (2014)

Adjusting to modern life in Washington, D.C., Steve Rogers uncovers a secret conspiracy that reaches the highest levels of S.H.I.E.L.D. Unsure of whom to trust, Cap partners with Natasha Romanoff and Sam Wilson (Falcon) to uncover a decades-long HYDRA infiltration. Along the way, he faces a legendary, silent assassin known as the Winter Soldier—who turns out to be his brainwashed childhood friend, Bucky Barnes.

Guardians of the Galaxy (2014)
Brash space adventurer Peter Quill (Star-Lord) finds himself the target of an intergalactic manhunt after stealing a mysterious orb. To escape the fanatical Kree warlord Ronan the Accuser, Quill forms a reluctant truce with a crew of outer-space misfits: assassin Gamora, vengeful warrior Drax, genetically modified raccoon Rocket, and tree-like humanoid Groot. Together, they discover the orb contains an Infinity Stone that could obliterate entire planets.

Avengers: Age of Ultron (2015)
Hoping to protect the planet from cosmic threats, Tony Stark and Bruce Banner secretly use the Mind Stone inside Loki's scepter to create an artificial intelligence defense program named Ultron. However, Ultron develops a dark savior complex, concluding that human extinction is the only path to peace on Earth. The Avengers reassemble to stop Ultron and his newly recruited enhanced allies, Wanda and Pietro Maximoff.

Ant-Man (2015)
Master thief Scott Lang is fresh out of prison and looking to reform his life for his young daughter. He is recruited by reclusive scientist Dr. Hank Pym to wear a suit powered by "Pym Particles," which allows him to shrink in size while vastly increasing his physical strength. Lang must embrace his inner hero to help Pym pull off a heist to stop Darren Cross, Pym's former protégé, from mass-producing military suits called the Yellowjacket.

Captain America: Civil War (2016)
An Avengers mission in Lagos goes wrong and causes innocent civilian deaths, leading the United Nations to introduce the Sokovia Accords to place all superheroes under government control.
A bomb explodes at a UN meeting in Vienna, killing King T'Chaka of Wakanda and framing Bucky Barnes.
The Avengers split into two opposing teams: Tony Stark, James Rhodes, and a newly recruited Peter Parker enforce government control, while Steve Rogers, Sam Wilson, and Wanda Maximoff go rogue to protect Bucky.
Following a massive battle at an airport in Germany, Steve breaks his team out of the Raft prison, Natasha Romanoff goes into hiding after secretly helping Cap escape, and Clint Barton takes a deal for house arrest to be with his family.
Once the real killer Helmut Zemo is caught, T'Challa spares his life and shelters Cap and Bucky in Wakanda so Shuri can fix Bucky's brainwashing, while Vision remains torn between his legal duty and his feelings for Wanda.

Doctor Strange (2016)

A famous brain surgeon named Stephen Strange loses the use of his hands in a bad car crash and travels to Kamar-Taj to find a cure.

Under the Ancient One, Strange and Wong learn magic, with Strange taking custody of the Eye of Agamotto housing the Time Stone.

Strange defeats the rogue magician Kaecilius, traps the giant dark entity Dormammu in a time loop, and becomes the protector of the New York Sanctum alongside Wong to defend Earth against magical threats.

Guardians of the Galaxy Vol. 2 (2017)

The Guardians are chased through space by a golden alien fleet after Rocket steals energy batteries.

Peter Quill meets his father Ego, a living planet who tries to use Peter to take over thousands of worlds, forcing Peter, Gamora, Drax, Rocket, and Groot to destroy him to save the galaxy.

Mantis leaves Ego to join the team, while Nebula resolves her deep-seated rivalry with Gamora and temporarily leaves to hunt down Thanos on her own before returning.

Spider-Man: Homecoming (2017)

Peter Parker tries to balance high school life with street-level crime fighting in New York under the mentorship of Tony Stark and Happy Hogan.

Peter discovers Adrian Toomes (The Vulture), who is illegally harvesting and selling leftover alien weapons from the 2012 Battle of New York.

After stopping Toomes, Peter decides to turn down a full-time Avengers offer to remain a local neighborhood hero, keeping Happy Hogan as his main contact for Stark technology.

Thor: Ragnarok (2017)

King Odin dies, releasing his evil daughter Hela (the Goddess of Death), who shatters Thor's hammer and conquers Asgard.

Thor and Loki get thrown onto the trash planet Sakaar, where they team up with Bruce Banner (who has been stuck as the Hulk for two years) and the warrior Valkyrie.

The group escapes to Asgard and triggers Ragnarok by unleashing the fire giant Surtur to destroy the realm, stripping Hela of her power source.

Thor unlocks his internal thunder powers, loses an eye, and takes the throne as King; Loki secretly steals the Tesseract (Space Stone) from Odin’s vault; and Lady Sif returns from space to help Valkyrie command the Asgardian refugees.

Black Panther (2018)

Following King T'Chaka's death, T'Challa is crowned King of Wakanda, but is challenged for the throne by Erik Killmonger, who briefly seizes power to export advanced Vibranium weapons to global insurgencies.

T'Challa reclaims his crown with help from Shuri, Okoye, the Dora Milaje, and the Jabari tribe leader M'Baku, subsequently opening Wakanda's borders to share its technological wealth with the world.

Shuri fully cures Bucky Barnes of his brainwashing using Wakandan technology, and establishing Wakanda as Earth's primary military and scientific fortress.

Avengers Infinity War (2018)
Thanos and his Black Order launch a full-scale assault across space and Earth to steal all six Infinity Stones.
Earth's heroes unite behind Wakanda's shield barrier to protect Vision and the Mind Stone.
Thor arrives with his new axe, Stormbreaker. A huge fight between the Avengers and Thanos takes place.
Nick Fury coordinates S.H.I.E.L.D. remnants to secure world government support.

Freeze Date: The Wakandan War

The main goal of the Mad Titan Thanos was that he believed the universe was overpopulated and would cause the depletion of resources. His goal was to collect all the 6 Infinity Stones, with the help of the Infinity Gauntlet. With just a snap, he wanted to wipe out 50% of living beings in the entire universe. He called it the “Universal Balance”.

At Wakanda, Shuri is trying to surgically remove the Mind Stone out of Vision’s head, without killing him. Black Panther, Captain America, Black Widow, Bruce Banner, Winter Solider, Okoye and M’Baku hold the front line against the alien army, which was trying to get past the vibranium shield.

Thor, Rocket and Groot arrive in Wakanda, with the help of Bifrost of the Stormbreaker.

At this point, Thanos already has 4 Infinity Stones (Power, Space, Reality, and Soul). After the fight against Iron Man’s team and the Guardians of the Galaxy in Titan and obtaining the Time Stone. He arrives at Wakanda to get the final one, the Mind Stone.

Significance of the Infinity Stones

- **Power Stone**: It controls destructive force. It can overload global power grids and vaporize life, if exposed for too long.
- **Space Stone**: It can control spatial manipulation. It can cause quick spatial tears and unannounced mass teleportation.

- **Reality Stone:** Holds absolute control over matter, physical laws, and perception. It can instantly alter the physical environment, warp natural elements, and project undeniable illusions that reshape what is real.
- **Soul Stone**: It can control life essence, and it has complete control over life, death, and the human spirit.
- **Time Stone**: Grants total authority over the flow of time. It allows the wielder to manipulate temporal events, manipulate decay or reversal, and peer into infinite potential futures.
- **Mind Stone**: It controls neural processes; It can take control over the mind of any individual.

Overview of Key Organisations and Weapons

Organizations and Factions:

- S.H.I.E.L.D. (Strategic Homeland Intervention, Enforcement, and Logistics Division): A top-secret international espionage and counter-terrorism agency tasked with maintaining global security against extraordinary and extraterrestrial threats. Led for many years by Director Nick Fury, it acts as the primary oversight body bringing together Earth's heroes.
- HYDRA: A shadowy, totalitarian paramilitary organization with the chilling motto "Cut off one head, two more shall take its place." Originating as a radical Nazi science division under Johann Schmidt (Red Skull), HYDRA survived for decades by secretly infiltrating global institutions—most notably S.H.I.E.L.D.—with the ultimate goal of achieving absolute global control through fear and subversion.
- The Dora Milaje: The elite, all-female special forces bodyguard unit sworn to protect the reigning monarch and the royal family of Wakanda. Trained from youth in martial arts, acrobatics, and traditional Wakandan weaponry, they are feared and respected across the globe.
- The Jabari Clan: A traditionalist, mountain-dwelling tribe of Wakanda. Isolated from the technological advancements of Wakandan cities for generations, they worship the gorilla god Hanuman and are renowned for their immense physical strength, brutal honesty, and fierce independence.

Iconic Suits, Armors & Equipment

- Captain America's Shield: A nearly indestructible circular disc composed of a unique Vibranium-steel alloy. Designed by Howard Stark, it absorbs kinetic energy, making it virtually impervious to impacts, shocks, and heavy blows, while possessing aerodynamic properties that allow it to be thrown like a boomerang.
- Nanotech Suit of Iron Man (Mark L and beyond): Advanced armor stored within a housing unit (such as a chest reactor or nano-housing bracelet) that uses

nanotechnology to deploy instantly over Tony Stark's body. It can morph into any weapon, shield, or booster thruster imaginable on command.

- Iron Spider Suit: A high-tech suit gifted to Spider-Man by Tony Stark. Made of metallic nanotechnology, it features enhanced durability, life-support functions, and four retractable mechanical spider-legs (waldoes) emerging from the back for tactical advantage.
- War Machine Armor (Colonel James Rhodes): Heavy, militarized tactical powered armor built by Stark Industries and customized for the U.S. military. Unlike Iron Man's sleek suits, War Machine is heavily loaded with conventional ballistic weaponry, including shoulder-mounted miniguns, missile pods, and wrist-mounted cannons.
- Black Panther's Suit: A sleek, advanced combat suit woven with Vibranium micro-weaves. It can absorb kinetic energy from impacts, bullets, and explosions, and subsequently redistributing that stored energy in a powerful shockwave blast.
- Bucky Barnes's Vibranium Arm: A sleek, advanced prosthetic arm crafted for the Winter Soldier by Wakandan scientists prior to the battle of Wakanda, replacing his older, standard-metal arm with pure Vibranium.
- EXO-7 Falcon Wings: A high-tech, collapsible mechanical wing pack used by Sam Wilson for aerial combat, reconnaissance, and tactical support, equipped with mounted firearms and a mini-drone companion named Redwing.

Weapons & Combat Arsenal

- Stormbreaker: An enchanted, colossal battle-axe forged at Eitri's forge on Nidavellir. Crafted from Uru metal with a handle made from a severed arm of Groot, it possesses the power to summon the Bifrost (interdimensional travel) and channel devastating lightning.
- Vibranium Weapons of Wakanda: A diverse arsenal—including spears, daggers, shields, and staff weapons—forged from Wakanda's sacred metal. These weapons possess exceptional durability, can slice through almost any known material effortlessly, and often feature energy-discharge capabilities.
- Star-Lord's Quad Blasters: Dual elemental guns worn on Peter Quill's hips. These versatile sidearms can fire lethal plasma blasts or switch to alternative elemental settings (such as stunning electricity or freezing ice).
- Necroswords of Hela: Manifested blades conjured directly from the Goddess of Death's hands or summoned from the ground. These jagged, obsidian-like weapons can be generated in infinite numbers and hurled with lethal precision or used in close-quarters combat.
- Wrist Guns of the Widows: Discrete, gauntlet-mounted energy weapons used by Black Widow and the Red Room operatives. They fire high-voltage electrical "widow's bites" capable of knocking out heavily armoured opponents or short-circuiting machinery.

- Hawkeye's Arrows: A specialized quiver of projectile weapons customized for Clint Barton's extraordinary marksmanship. It includes standard arrows alongside trick arrows containing explosives, grappling lines, acid tips, sonic disruptors, and EMP charges.
- Yondu's Yaka Arrow: A slender, lethal projectile weapon controlled entirely by the user's whistling through a specialized head-fin, capable of changing direction mid-flight and cutting through dozens of enemies in seconds.

Mystical Artifacts & Cosmic Energy Sources

- Doctor Strange's Cloak of Levitation: A sentient, mystical red cape that chooses its own master, granting the wearer the power of flight, levitation, and independent tactical defense during combat.

Advanced Science & Technologies

- Pym Particles: Subatomic particles discovered by Dr. Hank Pym that can alter the distance between atoms. This allows living beings and objects to shrink down to subatomic (quantum) scales or grow to giant sizes while retaining their mass and proportional strength.

RULES OF PROCEDURE (ROP)

DIRECTIVE

Directive is usually defined as an official instruction or order that tells a person, organization, or group what they must do, what they are allowed to do, or what they must avoid doing.

In simple terms, directive is a plan of action written down on how to deal with a specific crisis. This involves guiding your team to respond to the crisis.

It goes the same in a Marvel-themed crisis committee. Delegates need to form directives, which are used to take action, respond to a crisis, and implement decisions.

Types of Directives

Overt Directives:

A directive that involves actions carried out openly. This means that an overt directive will be known by everyone. All directives are overt by default. This means that if in any directive, if

the type is not mentioned, it will automatically be considered as an overt directive. Example: The Avengers publicly evacuate civilians from New York.

Covert Directives:

This involves secret operations where you don't want other delegates to know about your mission and who all are involved in it, including the person who wrote the directive.

If the directive is passed then, only the results or the consequences of the covert directive will be shared, not who did it or how it was done.

For example: The Guardians of the Galaxy secretly enter a base controlled by Thanos, to gather information about his plans. Only the result, that the information has been obtained, is revealed, while how they did it and who was involved remain a secret.

Remember: If your action is obvious, it cannot remain covert, even if you label the directive as secret. Taking the same example as above, The Guardians of the Galaxy, if they openly attack Thanos' base and destroy it, the action cannot remain covert because everyone can see what has happened.

Joint Directive

Directives which are sent by single characters are known as individual or single-character directives. For example: Spiderman investigates suspicious activity in New York City on his own.

Directives which are sent by a group of people is known as joint directive. For example: Star-Lord, Gamora, Drax, Rocket, Groot, Mantis, working together on a mission.

Mode of Directives:

Directives can be sent via:

1. Physical mode – Directive written in a paper with a pen or pencil and given to the EB physically.
2. Online Mode – Directive typed digitally and submitted through the designated platform or email provided by the EB.

The Executive Board of this committee will be expecting online mode.

Format of Directives:

Title: Operation/mission name

Type: Overt / Covert.

From: Character

To: Which authority can execute the plan (The Executive Board)

Signatories: other delegates who sign and consent to the directive

Primary Objective: The main goal

Secondary Objective: Extra benefit

Mission Brief: A short summary (3 - 4 lines).

Plan of Action: Step-by-step on how the team will carry it out (detailed).

Portfolio Requests:

This is when you ask your "side characters" or "resources" for extra information, which you don't have at the moment.

Format:

From: [Character]

To: [Ally]

Press Releases:

These are public statements you want your group to announce. They can be solo or group based.

Format:

From: [Character or Group]

Enclosed Epistle:

These are secret notes/messages you send to other characters outside your squad. They can include negotiations, warnings, threats, or requests.

Format:

From: [Character]

To: [Another character/squad]

ROP CHEAT-SHEET

Points:

1. Point of Personal Privilege: This is used for personal inconvenience, such as not being able to hear the speaker. You can interrupt a speaker if the problem requires immediate attention.
2. Point of Order: This is used when a delegate believes that a procedural rule is being violated or that the committee's proceedings are not following the rules. It cannot interrupt a speaker.
3. Point of Parliamentary Inquiry: This is used to clarify doubts about ROP. A delegate cannot interrupt a speaker.
4. Point of Information: This is used to ask questions about another delegate's speech. Usually when the speaker or the EB has opened the floor to questions. It cannot interrupt a speaker. ** can be raised to get clarity on crisis updates
5. Right of Reply: This is used when a delegate is personally insulted or directly attacked, not when they disagree with your country's policies.

   This involves few important rules:

   - All the points and motions are suspended when it begins.
   - It is granted at the discretion of the Executive Board.
   - You cannot interrupt a speaker to raise a Right of Reply.
   - The response must remain respectful and diplomatic.
   - Address the specific insult or personal attack rather than starting a new debate.

Yields:

1. Yield to Points of Information: The remaining time is used for questions.
2. Yield to Another Delegate: The remaining time is given to another delegate. The other delegate should be informed prior.
3. Yield to the Executive Board: The remaining time is given back to the Executive Board. EB can use it in 2 ways. One is doing nothing and moving onto the next speaker or opening the floor for questions for the delegate speaking.

Motions:

The delegates must set the agenda or raise a motion or establish the GSL, etc., in this verbatim, else it will not stand.

Setting the Agenda:

"Delegate of ___ would like to raise a motion to set the agenda as ___."

Formal debate:

1. ***Establishing a General Speakers List* (GSL):**

"Delegate of ___ would like to raise a motion to establish the General Speakers' List with an individual speaker's time of __."

2. ***Round Robin:***

During this, each delegate gets a turn to speak, one after another, on the topic being discussed. Unlike an informal consultation, delegates generally speak in a set order and have limited time to present their ideas. Turns cannot be repeated in the same session, and it is mandatory for everyone to speak.

Verbatim: "Delegate of ___ would like to raise a motion to move into a round robin for _ minutes."

Informal debate:

1. ***Moderated Caucus:***

"Delegate of ___ would like to raise a motion to suspend formal debate and move into a moderated caucus on the topic ___ for __ minutes, with individual speaker's time being __."

2. ***Unmoderated Caucus:***

"Delegate of ___ would like to raise a motion to suspend formal debate and move into an unmoderated caucus for __ minutes."

3. ***Extension of Informal Debate:***

"Delegate of ___ would like to raise a motion to extend the current moderated/unmoderated caucus by ___ minutes."

4. ***Consultation:***

During this, any delegate can stand up and speak anytime. However, they cannot interfere another delegate's speech. The executive board of this committee will be allotting a specified time limit for each delegate, so everyone has an equal opportunity to put their point forward. A delegate can also repeat their turn. It is not mandatory for everyone to speak.

Verbatim: "Delegate of ___ would like to raise a motion to move into a consultation for _ minutes,"
